## New Carrier Côr Thermostat

Carrier's revolutionary Côr thermostat (TP-WEM01) is in stock and ready to sell! At \$233, you can offer homeowners an incredible thermostat at a price which competes nicely with other top-tier thermostats in the marketplace.

One immediate distinction from those other stats is that the Côr is only available from Carrier dealers. This product will not be sold at Lowe's, Best Buy or online at [www.Carrier.com](http://www.Carrier.com). After your professional installation ensures that the thermostat is set up correctly, the latest software will be automatically downloaded to keep the homeowner up to date.

The full-color touch screen display on the Côr thermostat sits inside a sleek 4" by 4" frame. The screen senses motion and can brighten as homeowners approach. The intuitive programming is similar to the Infinity Touch and includes "Touch-N-Go," day-at-a-glance guided scheduling and smart setback.

One of the best features with the Côr thermostat is how it can save your homeowners money. Energy reports help them see exactly when their energy

dollars are being spent so they can modify settings to maximize savings. It will even provide your homeowner with customized energy saving tips.

The best source for you and your homeowners is [www.carrier.com/cor](http://www.carrier.com/cor). Also check out the video on [www.SiglerTV.com](http://www.SiglerTV.com) (password is swd).

Of course, it's remote accessible. To download the iPhone or iPad app, go to the App Store, or scan this QR code.

To download the Android app, go to Google Play or scan this QR code:

**2509622 or 2509822 = \$384**

**3509622 or 3509822 = \$413**

**5009622 or 5009822 = \$557**

### ZoneFirst

Even though you may not recognize the name, ZoneFirst has been the industry leader in zoning for over 50 years! ZoneFirst has led the way in excellence and continued innovation. Their products make zoning easier and more effective.

It was in the mid to late 1950's when Richard Foster developed the first automatic motorized dampers, registers and diffusers that were thermostatically controlled. He marketed these products under the trade name Zone-A-Trol with another company when in 1964 he founded Trolex Corporation and the start of the well-known trade name Trol-A-Temp. In 1999 the Trol-A-Temp brand was acquired by Honeywell.

Sigler Wholesale Distributors is proud to offer ZoneFirst products and has a full inventory of zone boards, dampers and the new pressure-relief damper. Try ZoneFirst on your next job and Sigler Wholesale Distributors will give you 20% off on that first order.

## Technical Tips

### Q: What's in your tool pouch?

A couple years ago we wrote three articles related to testing equipment tools you should consider. Many questions come to mind when it's time to purchase a tool or test instrument: is it durable, will it get the job done, is it more than I need or less than I need, can it be utilized for more than one function, can I afford it – or more importantly, can I afford not to have it? Last but not least, will it make my job easier?

We have previously discussed the type of meter probes you have, versus the work you need to perform, but maybe it's time to take a second look at the meter itself. Do you have what

you need when you need it, or are you in a position that could force you to "guess" during your next call?

If you do install and start-up, but not much troubleshooting, the standard "does everything ok but nothing great" meter will do the trick. If you troubleshoot, you need something a bit more... amps, microamps, millivolts, capacitance, AC and DC volts, hertz, resistance values at the 50K ohm range and higher... and the list goes on. Some chose to go with one meter, others go with multiples. What's important is to have a meter that exceeds your demands and can be trusted.
