

Up To Date

TARP

The popular Sigler Club is new and improved! It's now called Totaline Advantage Rewards Program (TARP) and features rewards from Amazon.com on everyday Totaline aftermarket parts purchases.

Carrier Scholarship

As a Carrier dealer, you have the opportunity to help your college-bound student fund their future. Info: <http://bit.ly/2GzxZdY>
App: <http://bit.ly/2GBPP04>
The Carrier Scholarship application is due May 31. Good luck!

Wells Fargo Financing

Haven't tried financing because it's too expensive? To get you started, Carrier is paying 4% of the cost of Plan 3016 to give you some extra power at the kitchen table. This promotion can be combined with Cool Cash but it expires on June 30, 2019.

Carrier's furnace assembly line in Indianapolis, Indiana

Fan Energy Rating Results in New Products

In 2014, the United States Department of Energy established the first national efficiency standard targeting a specific product component – residential furnace fans. The new Fan Energy Rating formula specifies a maximum energy rating that varies based on the airflow provided by the furnace fan. For gas furnaces and small packaged units, the new standards target a significant 46% watt reduction over a standard equipment with a PSC motor. The FER value is different for each furnace model, requiring every model to be re-designed for FER compliance.

Move forward five years and we're here. As of July 3, 2019, no equipment manufacturer will be able to produce equipment that does not comply with FER. Carrier engineers have been working hard and are ready to go with a complete line-up of new furnaces and small packaged products.

Product transitions are never easy, but Sigler Wholesale Distributors is committed to making this one as easy as possible. Frequent updates will be

available showing product availability of both the old and the new equipment. There is no price increase from a comparable product today with an ECM motor, but there is a significant price difference when comparing today's product with a PSC motor and the new product with an ECM motor. Below is a summary of the changes:

90% Furnaces

59MN7A → 59MN7B
59TN6A → 59TN6B
59TP6A → 59TP6B
59SP5A & 59SC5A → 59SC5B
59SP2A & 59SC2C → 59SC2D

80% Furnaces

58CVX → 58TN1A
58CTY → 58TP1A
58STX, 58DLX & 58PHY → 58SB1A

Payne Furnaces

PG95SAS & PG92SCS → PG95ESAA
PG8JAA → PG80ESLA

Small Packaged Product

48VGNB → 48VGNC
48VLNC → 48VLNE

Featured Products

Known for having "Nothing but Heavy Duty," Milwaukee tools are the best value you can find. With more than 60 different items in stock, Sigler Wholesale Distributors is your best source for Milwaukee Tools. Here's a list of some of the items that are in stock today with prices that rival all of the big box stores.

compact blower ▪ jobsite fan ▪ pliers
heated jacket ▪ compact USB flashlight
LED lantern ▪ hammer drill ▪ angle drill
hackzall ▪ AC/DC charger ▪ jobsite radio
compact drill / impact driver kit ▪ sawzall
ductwork blade ▪ extra battery pack
utility knife ▪ nut driver ▪ tubing cutters
tape measure ▪ tool box ▪ marker
compact organizer ▪ drill bits ▪ nut driver
right angle attachment ▪ and more!

CPS® Link™

CPS Link is a powerful, easy-to-use application that connects multiple CPS and AAB wireless sensors together at one time to create the world's most comprehensive diagnostic measurement system. The flexibility of this patented system enables users to add sensors as required to perform quick one-step measurement tasks or more complex full home, facility or system diagnostics with analytics. For some ideas about what is possible when you own smart, connected tools, download the free app from the App Store or Google Play.

A variety of high quality CPS Link wireless sensors, manifolds, gauges, scales and airflow meters are available from Sigler Wholesale Distributors. During the month of May, get 10% off on all CPS products! This includes CPS Link products, but also their complete line of recovery machines, pumps, gauges, manifolds, hoses, fittings and more. Check out the online videos for information about all CPS products at www.cpsproducts.com/training-center.

Technical Tips

Q: It's servicing time, what coil cleaners should I use on aluminum tube coils?

When it comes to coil cleaners there are 3 distinct challenges - will it work, will it cause harm to the coil material, and is it environmentally safe. For many years with copper tube aluminum fin coils you probably used a mild detergent and rinsed it thoroughly. This also holds true for aluminum tube coils, but then someone is bound to say "define mild detergent".

So, if you want to keep one product on your truck that will handle both indoor and outdoor coils, aluminum tube or copper tube, try the Totaline Environmentally Sound Coil Cleaner (P902-0301) or Simple Green Aircraft & Precision Cleaner (13406).

If you are of the belief that you need something different for indoor coils and outdoor coils (and there is some merit to that), than Nu-Calgon has the products that will do the trick. Evap Green (4191-08) works well for indoor coils, while Cal-Green (4190-08) takes care of outdoor coils, aluminum or copper tube.

As with any chemical product, follow manufacturer's recommendation for application and use. Ensure you rinse coils thoroughly with clean water after using any chemical cleaner. Last but not least, make sure you let the homeowner know you are using an environmentally safe product.
