

Up To Date

Shelter in Place Hours

We know that your business is essential and all of us at Sigler

Wholesale Distributors thank you for the service that you're providing to the community. We are here to support you.

During this time, our hours of operation will be:

- *Concord:*
7:00-11:30, 12:30-3:00
- *San Jose:*
7:00-3:00
- *South San Francisco:*
7:00-11:30, 12:00-3:00

Spring Training

The scheduled Infinity Sales training will now be held as a webinar on Tuesday, April 7 at 9:00.

Ultra Low NOx Furnaces

As of April 1, standard furnaces may not be used in the San Joaquin Valley, even if you're paying a mitigation fee. Carrier's new line of Ultra Low NOx furnaces are now available for your jobs east of the Altamont Pass.

What's New on *SiglerTV*

A technician installing the Carrier Infinity Air Purifier

Indoor Air Quality Solutions

Most of the world is paying more attention to indoor air quality than ever before. It's appropriate to offer solutions that help mitigate a homeowner's concern, but we must be careful to not make promises that cannot be kept. While some products have undergone germicidal testing, no IAQ products have been tested against the COVID-19 virus.

Carrier Infinity Air Purifier

Using Carrier's patented Capture & Kill technology, this air purifier traps up to 95% of particles between 1.0 and 3.0 microns and then uses an electrical charge to kill or inactivate them. Independent testing has shown the Infinity Air Purifier is >99% effective in killing the common cold surrogate, Streptococcus pyogenes and human influenza. (Model DGAPAXX* is available in five different sizes to match most Carrier furnaces and fan coils).

IQAir Perfect-16

The HyperHEPA filtration in the Perfect-16 is certified to filter ultrafine particles

down to 0.003 microns – the smallest particles that exist. Ordinary HEPA filters can only filter particles larger than 0.3 micron particles and cannot capture most pet dander, tobacco smoke, soot and viruses. (Model P16-ID-* is available in two different sizes).

IQAir HealthPro

The technology of the Perfect-16 is also available as a portable room air cleaner. Each unit has the same HyperHEPA filtration and is factory tested to ensure that it is delivering 99.97% cleaner air or better. (Model HEALTHPROPLUS).

Five Seasons CinQuartz FSP900

This portable room air cleaner is a solution that combines HEPA, UVC germicidal light and photo catalytic oxidation. It removes and destroys allergens, lung damaging atmospheric dust, biological and chemical contaminants and odors, such as formaldehyde, toluene, benzene, cooking odors, tobacco smoke, bacteria, viruses, mold and lots more. (Model FSP900).

Featured Products

Carrier Heat Pumps

With the ongoing drive away from natural gas, Sigler Wholesale Distributors has boosted inventory of Carrier heat pumps. The models now readily available are:

Comfort Series

25HCE4 – Single Stage

25HBC5 – Single Stage

Performance Series

25HHA4 – SlimLine Single Stage

25HPB6 – Deluxe Single Stage

25HCB6 – Two Stage

Infinity Series

25VNA8 – Two or Five Stage

25VNA0 – Greenspeed (phasing out)

25VNA4 – Greenspeed (phasing in)

The 5-2-1 Compressor Saver significantly reduces the time the compressor draws high amperage at startup. By combining a powerful multi-layer starting capacitor with a smart switch, it safely gives the compressor the burst it needs to start up quickly and reliably while drawing less power.

Why should you include the 5-2-1 Compressor Saver on every job with a single-stage scroll compressor?

- It extends the life of a compressor.
- Damaging in-rush current is reduced by up to 50%.
- Homeowners save money when their system uses less energy.
- May help start condensing units that are beginning to fail.

During the month of April, save 10% when you buy a box of ten 5-2-1 Compressor Savers. Three models are in stock:

- CSRU1 1-3 tons (88-108 μ F)
- CSRU2 3.5-5 tons (189-227 μ F)
- CSRU3 4-5 tons (270-324 μ F)

Technical Tips

Q: How do you suggest we pass the time while sheltering in place?

With the state of things these days, people have more time to spend behind a screen. Take advantage of technical tools that produce big-time gains with a small-time investment.

HVACPartners.com is still the rock for product information and training. A little time spent exploring its hidden potential will yield powerful results. Also, try carrier.hvacpartners.com where you'll find a lot of literature without a login.

SightCall is a new program we are using to enhance technical support experience. By downloading SightCall app on your phone, you will have the

ability to receive live video tech support while on the job.

Don't forget about Siglernorcal.com. With SiglerTV, you can search through recent training class clips when looking for a needle in a haystack. Siglernorcal.com is locally maintained and tailored for our region.

The Carrier Service Tech App has a "Parts and Jobs" feature. This aids in determining replacement parts based on model number while at the jobsite. Parts needed can be grouped by job name. The app is also a great hub for literature, tech links, and step by step troubleshooting.
