Stocking Stuffers for your HVAC Family

Do you have any HVAC technicians on your shopping list? Or maybe you're ready to do some shopping for yourself? Either way, we have some cool products for you to consider this holiday season!

Magnetic Test Leads (MAG1BK)

No more popping off terminals while you are troubleshooting. This magnetic jumper is made specifically for recessed terminals found inside thermostats and boards.

Furnace Pro Switch Clip (FPRO100)

Temporarily engage the blower door switch to make furnace repair and installation easy. Made with strong rare earth magnets.

Folding Duct Thermometer (SPK2)

Great for taking quick air temperatures and small enough for your pocket. It has a large display and T1-T2 calculation.

L'I'L POPPER (POP3 or POP5)

Save your fuses while diagnosing control circuit failures. Plug the leads into the fuse terminals on the board and you can now do a manual reset each time the fuse pops. Available in 3 and 5 amps.

Carrier Air Monitor (RMAM-ST)

Give your homeowners peace of mind with an air monitor that beautifully integrates with their Carrier Home app.

Gasket Remover Tool (19047)

It's time to replace the worn gaskets from your hoses. This tool with a sharp, angled pick is long enough to pull the gasket from deep inside the hose while the other end is for placing the depressor inside the hose.

Featured Products

In 1917, Walter Kidde founded the Walter Kidde Company, which produced the first integrated smoke detection and carbon dioxide extinguishing system for use on board ships. This invention marked just one of many firsts that would help make the world a safer place to live and define a 100-year history of industry leadership.

Heading into a busy heating season, now is a great time to stock up on smoke and CO alarms. The following items are all listed in the Sigler Club program and can be part of your qualifying order.

"Living Room" Smoke Alarm
"Bedroom" Smoke Alarm with Voice
"Hallway" Smoke Alarm with Light
"Kitchen" Smoke Alarm with CO Sensor
Battery Powered CO Alarm
10-Year CO Alarm

For more than 60 years, Mason Industries has been the premier supplier of spring mounts and housings for the HVAC industry. Their products are practical for nearly all installations – residential and commercial. They can prevent noise and high frequency vibration.

Several Mason products are readily available at Sigler Wholesale Distributors, including the "Super W" waffle pads, NDA double-deflection neoprene mounts, IMF spring mounts, 30N spring double-deflection spring hangers and more.

During the month of December, mention this article and save 10% on all Mason products from local inventory.

Technical Tips

Q: This mini split worked great, but now I call for heat and get nothing?

Summer is finally coming to an end and your homeowner has now turned their mini split from cooling to heating. They call up to tell you that the louver is open halfway and there is no fan. Or, if it's a ducted system, they may tell you that the condenser tried but then stopped without giving any fault codes.

This is an indication that the system is low on refrigerant. Remember that the T1 sensor starts the fan in heating mode when it senses 104 degrees. However, that sensor doesn't control the fan in cooling mode.

Start by switching the system into cooling and add a couple of ounces of

refrigerant to get the system running. Then, turn the system back to heat and look for blower action. If there is no fan, repeat the process again. This will make it easier to locate those small leaks because the lines will be under higher pressures in heating. Inspect those flair fittings. Remember it is your job to locate and repair all known refrigeration leaks.

After you have repaired those leaks remember the refrigeration credo for mini split systems – when in doubt weigh it out! Remove and weigh the gas that was in the system and recharge it to factory specs with new refrigerant.
