

Up To Date

Price Increase

Due to Section 232 tariffs, there was a nationwide price increase that went into effect on April 27, 2026. Be sure to use current pricing and tools for your projects.

Comfortably CA

Rebates of \$100 per ton for an efficient heat pump and fuel substitution are still available for Temperature Tough and Temperature Tough Gold Dealers. Note that claims for invoices prior to March 31 must be submitted by May 8 and claims for invoices in April must be submitted by May 22.

R454B

The price of R454B has dropped with an added rebate for dealers who buy a condensing unit on the same order.

Memorial Day

All Sigler locations will be closed on Monday, May 25.

The beach at the Sofitel Fiji Resort and Spa on Denarau Island

2027 Incentive Trip - Fiji

Basking in the golden glow of the South Pacific, Denarau Island serves as the gateway to a world of pure tropical indulgence. Set against the backdrop of the Mamanuca Islands, the Sofitel Fiji Resort & Spa perfectly balances high-end luxury with the soul-stirring "Bula" spirit that makes Fiji legendary. Sigler Wholesale Distributors is thrilled to return to this island sanctuary as our destination for the 2027 incentive trip.

Our home for the week, the newly renovated Sofitel, is a true beachfront masterpiece. While the resort's massive lagoon pool might tempt you to never leave your lounge chair, the call of the turquoise ocean is hard to ignore. Whether you are snorkeling through vibrant coral reefs, taking a jet ski safari, or simply enjoying a kava ceremony under the stars, the rhythm of island life is mesmerizing. If adventure is your aim, the world-class surf breaks and championship golf courses are just minutes away. Of course, the culinary experience is just as bold, blending fresh Pacific ingredients with French culinary flair to ensure every meal is a highlight.

However you choose to spend your time, this Fijian escape is set to be the pinnacle of your travel year.

To accommodate everyone, the group will be split into two waves: the first half will travel from March 6 to March 14, while the second half will follow just a day later. The cost per couple is \$9,000. Remember that this can be completely offset by accumulating points every time you buy equipment, parts, and supplies from Sigler Wholesale Distributors. Active program dealers can also pre-purchase points at a great discount. This makes the trip very affordable for dealers of any size to join in the fun!

To register with our partner at ICM Travel, the dealer principal should log in at Siglers.com, click "Marketing Programs" and then select "Incentive Trip." Once that initial form is in, guests will receive an invitation to the Fiji registration portal at ICMtravel.com. This is where each guest can lock in their details and request those specialized flight or room upgrades. If you hit any snags, your territory manager is ready to help. We'll see you in Fiji!

Featured Products

Locking caps are a good idea on your jobs, even if the inspector isn't looking for them. With A2L refrigerant on newer jobs and R410A or R22 on the older ones, it's going to be increasingly important to provide visual cues to ensure service techs stay safe. Red A2L caps from Rectorseal are a great way to do that.

These caps are precision machined from high-grade brass and covered by a shielding aluminum shroud. They're resistant to crushing and corrosion and have integral neoprene O-rings that resist oils and sealants. Different caps are available for cube style units and the minisplits / crossover systems:

	26* & 27*	37*
2 Pack	86687	86701
10 Pack	86686	86702
50 Pack	86689	86703

Sigler Wholesale Distributors now stocks the new Azure ECM direct drive replacement blower motor. This motor features Bluetooth control when using the AZURE ECM smartphone app. While not required for the installation of these motors, the app allows the installer to take full advantage of the ECM technology.

Nearly a one-size-fits-all solution, this motor replaces 16 pin variable speed motors, many 4 pin variable speed motors and constant torque motors. It operates with four speeds plus a low 625 RPM constant fan mode.

Two 85% high efficiency models are available. Both are 115 or 230 volts and utilize a belly-band mount.

10856 = ¼ to ½ HP

10857 = ½ to 1 HP

Technical Tips

Q: Can I use an ADP evaporator coil with the Carrier Infinity system?

In Northern California, ADP evaporator coils have been the preferred choice of contractors for several decades. Always on the leading edge of innovation, they rate well, match the furnace width and were the only coil manufacturer with a "Flex" coil which could be installed in a R410A or R454B application.

ADP continues to be a premier option for Comfort Series and Performance Series equipment, but their coils will not work with Infinity Series product with Puron Advance (R454B) refrigerant. This is because the dissipation control board ships with either the Carrier or ADP evaporator

coil, and it's critical that the Infinity System communicate with that board. Carrier's proprietary communication protocol via the ABCD wires is not something the ADP board can handle. Only Carrier's CAAMP or CVAVA coils have a dissipation board with an ABCD port and only these models can be used with an R454B Infinity System.

Always be sure to check Sigler Selections or the Combination Ratings Tool spreadsheet to ensure that the system you're considering is AHRI rated. Both of those documents have been recently updated. If you need help navigating AHRI directory.org, reach out to your TM for assistance.
